

Dr Kenneth Y. WERTHEIM

SUMMARY

CITIZENSHIP: British citizen
EMAIL: kywertheim@protonmail.com
WEBSITE: <https://www.kywertheim.com>

Systems theorist with expertise in mathematical modelling, scientific computing, and machine learning. Biological and social systems are my main interests, but I develop applications of artificial intelligence too. When I am not theorising, I advocate social justice and teach yoga.

•**Modelling Frameworks and Computational Methods.** Multiscale modelling, multiphysics modelling, differential equations, agent-based modelling, Boolean networks, finite element method, Monte Carlo methods, Tarjan's algorithm, genetic algorithms, and multicellular simulation.

•**Artificial Intelligence and Data Science.** Regression, classification, clustering, dimensionality reduction, association rule learning, deep learning, reinforcement learning, computer vision, natural language processing, and generative AI.

•**Computer Skills.** Python, MATLAB, R, C++, LaTeX, COMSOL, Git, and Linux.

•**Communication Skills.** English (5/5), Cantonese (4/5), Mandarin (3/5), Toki Pona (3/5), German (2/5), yoga instruction (200RYT), and mental health first aid (MHFAider@).

SELECTED ACHIEVEMENTS TO DATE

- Published 12 peer-reviewed papers on topics in computer vision, immunology, oncology, developmental biology, cancer biology, medicinal chemistry, and tissue engineering.
- Built the first multicellular computational model of neuroblastoma.
- Devised a multi-approach and multi-scale method to model the immune system.
- Proposed a theory about the chemical basis of lymphangiogenesis.
- Awarded the International Intellectual Benefits to Society Award by Mensa Foundation.
- Awarded over 221k GBP to fund my education and research on five continents.

EDUCATION

FEB 2017 **PhD, BIOENGINEERING, University of Southampton, the UK**
Thesis title: *Mathematical Modelling of Lymphangiogenesis*

DEC 2013 **MS, CHEMICAL ENGINEERING, Columbia University, the USA**
GPA: 3.60/4.00

JUN 2012 **MEng, CHEMICAL ENGINEERING, Imperial College London, the UK**
First-class honours

JUN 2011 **Exchange Year, CHEMICAL ENGINEERING, University of Sydney, Australia**
First-class honours

MAY 2008 **International Baccalaureate (IB), Sevenoaks School, the UK**
IB score: 44/45

CERTIFICATES

JAN 2025 **GENERATIVE AI NANODEGREE, Udacity**

JAN 2025 **DEEP REINFORCEMENT LEARNING: VALUE-BASED METHODS, Udacity**

SEP 2024 **COMMUNICATING WITH NATURAL LANGUAGE, Udacity**

AUG 2024 **ADVANCED COMPUTER VISION AND DEEP LEARNING, Udacity**

JUL 2024 **MENTAL HEALTH FIRST AIDER (MHFAIDER@), MHFA England**

DEC 2023 **INTRODUCTION TO COMPUTER VISION, Udacity**

OCT 2023 **BUILDING GENERATIVE ADVERSARIAL NETWORKS, Udacity**

OCT 2023 **200-HOUR YOGA TEACHER TRAINING, Yoga Alliance Professionals, the UK**

AUG 2023 **NATURAL LANGUAGE PROCESSING SPECIALISATION, DeepLearning.AI, the USA**

SEP 2021 **GENOMIC DATA SCIENCE SPECIALISATION, Johns Hopkins University, the USA**

NOV 2018 **MACHINE LEARNING ENGINEER NANODEGREE, Udacity**

SEP 2017 **WHOLE-CELL MODELLING, Centre for Regulatory Genomics, Spain**

RESEARCH AND DEVELOPMENT EXPERIENCE

JAN 2023 NOW	Principal Investigator, UNIVERSITY OF HULL, the UK <ol style="list-style-type: none">1. Secured a DAIM PhD studentship. Helped a visiting PhD candidate secure a scholarship from the China Scholarship Council.2. Established a collaboration with St. Anna Children's Cancer Research Institute in Austria (Dr Sabine Taschner-Mandl). Supervising or co-supervising three PhD candidates (Francesca Covell, Gulraiz Khan, and Linhao Chen).3. Evolutionary therapy for neuroblastoma. Used ordinary differential equations to model neuroblastoma's phenotypic plasticity and test inhibitors targeting this property.4. Social dynamics in linguistically diverse communities. Modifying Schelling's model of segregation to incorporate linguistic dimensions.5. Real-time 3D reconstruction from 2D human images. Connected a backbone deep learning model to multiple lightweight branches to predict the facial landmarks, ages, and genders of human face images.
JAN 2023 NOW	Project Supervisor, UNIVERSITY OF HULL, the UK <ol style="list-style-type: none">1. Proposed and/or supervised 31 MSc dissertation projects in artificial intelligence, including collaborations with the NHS, Spencer Group, and Hull York Medical School.2. Healthcare, platelet proteomics, medical image classification, patient record classification, dysarthric speech recognition, sport science, game development, fintech, optical character recognition, image captioning, multimodal sentiment analysis, retrieval-augmented generation, and optimisation.3. Two students won the Best MSc Research Project Prize.
FEB 2019 JAN 2023	Project Supervisor, UNIVERSITY OF SHEFFIELD, the UK <ol style="list-style-type: none">1. Conceived an independent research programme and secured funding.2. Established international collaborations with Dr Fabio Dercole from the Polytechnic University of Milan in Italy and Dr Sabine Taschner-Mandl from St. Anna Children's Cancer Research Institute in Austria.3. Supervised or co-supervised six undergraduates (Jack Ashurst, Abigail Barlow, Rory Deignan, Daniel Jordan, Ritvik Mehra, and Alvaro Andre Yupanqui Rivera), one master's student (Melody Parker), and one PhD candidate (Matteo Italia).4. Optimised chemotherapy for neuroblastoma based on evolutionary principles.5. Proposed a theoretical solution to the MYCN enigma based on the ARF/MDM2/p53 axis.6. Modelled intracellular mechanisms regulating neural crest development.7. Ordinary differential equations, genetic algorithm, Apriori algorithm, probabilistic Boolean networks, and Tarjan's strongly connected components algorithm.
FEB 2019 JAN 2023	Computational Oncologist, UNIVERSITY OF SHEFFIELD, the UK <i>Supervisor: Dr. Dawn Walker</i> <ol style="list-style-type: none">1. Predictive <i>in Silico</i> Multiscale Analytics to Support Cancer Personalised Diagnosis and Prognosis, Empowered by Imaging Biomarkers (PRIMAGE). 10 million-euro Horizon 2020 project involving 16 institutions from eight countries.2. Built the first multicellular computational model of neuroblastoma. Built surrogate models by multiple linear regression and deep learning.3. GPU-accelerated virtual drug trials on the Bessemer high-performance computing cluster to propose an unconventional therapy based on targeting p53's regulators.4. Collaborated with the University of Zaragoza, University of Bologna, and Chemotargets SL to integrate my model with their organ-scale and single-cell models with a new scale separation approach.5. Co-supervised an undergraduate student (Will Shaw) who reviewed the literature about diffuse intrinsic pontine glioma (DIPG).6. Supervised an undergraduate student (Luke Jones) who modelled DIPG's clonal evolution and invasive spread in a biological lattice-gas cellular automaton.7. Other techniques: Latin hypercube sampling, dimensionality reduction, clustering, and hypothesis testing.

RESEARCH AND DEVELOPMENT EXPERIENCE (CONTINUED)

MAR 2017	Computational Biologist , UNI. OF NEBRASKA-LINCOLN, the USA
JAN 2019	<i>Supervisor: Prof. Tomas Helikar</i> <ol style="list-style-type: none">1. Built a multiscale and compartmental model of CD4+ T lymphocytes by using agent-based modelling, Boolean networks, constraint-based modelling, and ordinary differential equations.2. Wrote a simulation algorithm and predicted switch-like and oscillatory behaviours for CD4+ T lymphocytes from the results. Monte Carlo method, Kolmogorov-Smirnov test, linear programming, and finite difference method.3. Added more agent types to the model, including neutrophils, macrophages, dendritic cells, basophils, and CD8+ T lymphocytes.4. Supervised two PhD candidates (Aimee Kessell and Sydney Townsend) and three undergraduate students (Alyssa La Fleur, Robert Moore, and Bailee Lichter).
FEB 2014	PhD Candidate , UNIVERSITY OF SOUTHAMPTON, the UK
FEB 2017	<i>Supervisor: Prof. Tiina Roose</i> <ol style="list-style-type: none">1. Constructed a reaction-diffusion-convection model; its 15 partial and ordinary differential equations describe the dynamics of VEGFC, MMP2, TIMP2, collagen I, and MT1-MMP in the zebrafish embryo. Computer simulations in COMSOL (finite element method).2. Simplified the model to four equations and wrote an algorithm to sample the parametric space to perform Turing pattern analysis.3. Proposed a theory about the chemical basis of lymphangiogenesis.
SEP 2012	Graduate Research Assistant , COLUMBIA UNIVERSITY, the USA
DEC 2013	<i>Molecular Simulation of Nucleosomes</i> <i>Supervisor: Dr. Vanessa Ortiz</i> <p>Helped a senior colleague study the effects of DNA methylation on nucleosome formation. MD simulations and alchemical FEP calculations in NAMD. TCL scripting.</p> <i>Image and Quantitative Analysis of SNARE-Mediated Membrane Fusion</i> <i>Supervisors: Prof. Ben O'Shaughnessy and Dr. Ben Stratton</i> <p>Used Speckle TrackerJ (ImageJ plugin) to analyse TIRFM images of SNARE-mediated membrane fusion in a microfluidic setup.</p>
OCT 2011	MEng Student , IMPERIAL COLLEGE LONDON, the UK
DEC 2011	<i>Supervisor: Prof. Cleo Kontoravdi</i> <p>Used ordinary differential equations to model the unfolded protein response. Ran gPROMS-aided computer simulations of the progression of Alzheimer's disease.</p>
JUL 2011	IAESTE Intern , UNIVERSIDAD NACIONAL DE LA PLATA, Argentina
SEP 2011	<i>Supervisors: Prof. Eduardo Castro, Prof. Pablo Duchowicz, Dr. Andrew Mercader</i> <p>Built 10 QSAR models by multiple linear regression to predict the activities of tacrine-related acetylcholinesterase inhibitors in the treatment of Alzheimer's disease.</p>
NOV 2010	Intern , UNIVERSITY OF SYDNEY, Australia
MAR 2011	<i>Supervisors: Prof. Hala Zreiqat and Dr. Iman Roohani</i> <p>Prepared strontium-doped magnesium silicate scaffolds for bone tissue engineering and characterised them by X-ray diffraction.</p>

TEACHING EXPERIENCE

JAN 2023 NOW	<p>Lecturer, UNIVERSITY OF HULL, the UK <i>MSc Artificial Intelligence and Data Science</i></p> <ol style="list-style-type: none">1. This fast-track conversion course allows graduates from all academic backgrounds to launch a career in artificial intelligence (AI) and data science.2. Taught Applied AI in Summer 2023 and Spring 2024. Promoted to module leader in Autumn 2024. Supervised, unsupervised, and reinforcement learning algorithms. Computer vision and natural language processing applications.3. Gave guest lectures on cancer modelling in Research and Application in AI and Data Science (Spring 2023, Summer 2023, and Spring 2024).4. Provided support to 47 personal supervisees in their personal, academic, and professional development. <p><i>MSc Artificial Intelligence for Engineering</i></p> <ol style="list-style-type: none">1. Co-founded this variant degree for mathematically inclined students in 2025.2. Designed and built a module titled Numerical Methods for Engineering, including the lecture slides, programming exercises, and assessments.3. Led and taught the module in Spring 2025. Linear algebraic equations, non-linear algebraic equations, numerical differentiation, interpolation, curve fitting, quadrature, initial value problems, boundary value problems, and eigenvalue problems. <p><i>Nuffield Research Placements</i></p> <ol style="list-style-type: none">1. Collaborated with Paula Symonds from Direct Education Business Partnership to arrange summer placements for 10 Year 12 students in July and August 2024.2. Coordinated a team of five PhD candidates, who gave AI lectures and guided the students when they built a chatbot and a facial emotion detector.
NOV 2023 NOW	<p>Yoga Teacher, YOGA PONA</p> <ol style="list-style-type: none">1. Set up a yoga business and branded it with its own name and logo.2. Designed and built a website. Prepared other promotional materials.3. Planned and taught <i>vinyasa</i> yoga classes catering to various needs and experience levels. Energising sessions for motivation, meditative sequences for relaxation, and a progressive foundational series.4. Taught at Hull University Students' Union and covered classes at Allam Sport Centre.
MAY 2021	<p>Guest Lecturer, UNIVERSITY OF SHEFFIELD, the UK</p> <p>Proposed the addition of an introductory lecture on partial differential equations to Modelling and Simulation of Natural Systems. Independently designed and delivered the lecture to around 100 undergraduate and master's students.</p>
SEP 2014 FEB 2017	<p>Demonstrator, UNIVERSITY OF SOUTHAMPTON, the UK <i>Design and Computing</i></p> <ol style="list-style-type: none">1. Tutored around 450 first-year undergraduate students in Python programming and basic numerical methods in computer lab sessions.2. Provided continuous feedback to around 100 first-year undergraduate students who designed and built launchers in two weeks. <p><i>Thermofluids</i></p> <ol style="list-style-type: none">1. Two-semester introductory course in thermodynamics and fluid mechanics for around 500 first-year undergraduate students.2. Demonstrated four experiments about drag forces, ideal gas properties, thermodynamic cycles, and hydrostatic forces.3. Marked and provided feedback on problem sheets and lab reports.
SEP 2012 DEC 2013	<p>Teaching Assistant, COLUMBIA UNIVERSITY, the USA <i>Analysis of Chemical Engineering Problems I</i></p> <ol style="list-style-type: none">1. Python-based course about numerical methods for 60 chemical engineering juniors.2. Held office hours and tutored the students in computer lab sessions. Prepared code for assignment solutions and graded assignments. <p><i>Chemical Engineering Laboratory</i></p> <p>Demonstrated how to separate ammonia from air in a packed bed absorption column to 31 chemical engineering seniors.</p> <p><i>Transport Phenomena I</i></p> <p>Theoretical course about momentum and energy transport for 60 chemical engineering juniors. Held office hours, recitations, revision lectures, and graded assignments.</p>

ADVOCACY EXPERIENCE

JAN 2023 NOW	EDI Champion, UNIVERSITY OF HULL, the UK <ol style="list-style-type: none">1. Represent the department at the faculty level and help develop the faculty's equality, diversity, and inclusion (EDI) plan.2. Within the department, offer practical EDI advice as required and raise awareness of EDI issues and activities.3. Signposted after the anti-immigration protests and riots in 2024. Convened a focus group to gather feedback on the staff portal in 2024.4. Incorporated the stories of eight minoritised innovators into Numerical Methods for Engineering. Created video content for International Women's Day 2025.5. Spoke at internal conferences, gave departmental seminars, and led induction sessions on linguistic justice, languaging in diverse communities, and microaggressions.
JAN 2023 NOW	Mentor, IMPERIAL COLLEGE LONDON, the UK <ol style="list-style-type: none">1. Imperial College Careers Service's Alumni Mentoring Scheme. The scheme supports the development of student employability and encourages the networking propensity of students from underrepresented groups.2. Activate Student Mentoring Programme. Established as a part of Imperial College London's 2021 Race Equality Charter Action Plan to support recipients of master's scholarships for disabled students and presidential scholarships for students of black heritage, as well as minority ethnic and disabled PhD students.3. In March 2025, I was on an autistic graduate careers panel, sharing my experiences, challenges, and coping strategies with Imperial students.
OCT 2020 SEP 2022	EDI Committee Member, UNIVERSITY OF SHEFFIELD, the UK <ol style="list-style-type: none">1. Researcher representative on the Department of Computer Science's EDI Committee.2. Represented the department in the Faculty of Engineering's working group on race.3. Contributed to discussions in EDI working groups and an anti-racism reading group.4. Invited Siena Castellon, an internationally recognised neurodiversity advocate, to give a Women+@DCS seminar in January 2021.5. Helped organise the biennial departmental EDI survey in May 2021 and a summer project to design an inclusive undergraduate curriculum in 2021.6. Department renewed its Athena SWAN Silver Award for five years in September 2021.

OTHER EXPERIENCE

JAN 2018 NOW	Reviewer <ol style="list-style-type: none">1. Uni. of Nebraska-Lincoln. Selection committee of the Undergraduate Creative Activities and Research Experiences (UCARE) programme in 2018. Evaluation panel at the Institute for International Teaching Assistants in 2018.2. Uni. of Hull. Hull York Medical School's faculty selection panel in 2023 and Faculty of Science and Engineering's Ethics Committee in 2024 and 2025.3. I have reviewed original research articles for the <i>Journal of Applied Physiology</i>, <i>IEEE Transactions on Biomedical Engineering</i>, and <i>Systems Research and Behavioral Science</i>.4. I have served as a grant reviewer for the National Institute for Health and Care Research (NIHR) and Medical Research Council (MRC).
NOV 2020 FEB 2023	Alumni Representative Committee Member, COLUMBIA UNI., the USA <p>Interviewed 24 undergraduate applicants from different ethnic, socioeconomic, and academic backgrounds.</p>
JAN 2017	Faculty Tour Guide, UNIVERSITY OF SOUTHAMPTON, the UK <p>Led guided tours of the engineering buildings for incoming students and visitors.</p>
AUG 2008 SEP 2008	Office Clerk, K.C. HO AND FONG SOLICITORS AND NOTARIES, Hong Kong <ol style="list-style-type: none">1. Translation of legal documents from Standard Chinese to English.2. Essential office tasks such as photocopying, scanning, and printing documents.
MAY 2008	Catering Assistant, SEVENOAKS SCHOOL, the UK <ol style="list-style-type: none">1. Not impressed with what I had experienced and witnessed at this registered charity, I joined the catering department to make a statement about educational injustice.2. Served food and cleaned the dining hall after meals.
JUL 2007 AUG 2007	Laboratory Technician, CHINESE UNIVERSITY OF HONG KONG, HK <p><i>Supervisors: Prof. Henry N.C. Wong and Dr. Sam C.K. Hau</i></p> <p>Assisted in labour-intensive and hands-on tasks related to organic synthesis.</p>
SEP 2006 JUN 2007	Gardener, SEVENOAKS SCHOOL, the UK <p>I maintained and redesigned gardens on campus.</p>

HONOURS AND AWARDS

FEB 2024	Fellowship of the Higher Education Academy (FHEA), Advance HE
AUG 2023	DAIM studentship, University of Hull (~£93,336)
OCT 2022	Recognition as an outstanding postdoc, University of Sheffield
JUL 2022	Departmental Recognition Award, University of Sheffield (£125)
MAY 2022	Sheffield Undergraduate Research Experience Scheme Bursary, University of Sheffield (£1,250)
JUL 2020	International Intellectual Benefits to Society Award, Mensa Foundation
MAY 2020	Engineering Researcher Society Development Opportunity Fund, University of Sheffield (£250)
2019–22	Insigneo Summer Research Grant, University of Sheffield (£7,700)
JUL 2018	Open U1600 Section Champion, 2018 Cornhusker State Games: Chess
JUN 2018	Travel fellowship for the 26th Conference on Intelligent Systems for Molecular Biology (US\$ 750)
SEP 2017	Travel grant for the 2017 Whole-Cell Modelling Summer School (US\$ 1,000)
MAR 2015	Conference bursary for the British Applied Mathematics Colloquium 2015 (£115)
JAN 2014	EPSRC studentship, University of Southampton: tuition, a budget, and a stipend (~£56,984)
FEB 2012	Departmental scholarship, Columbia University: tuition, fees, and a stipend (~US\$ 74,905)
JUL 2011	Research bursary, IAESTE Argentina (~US\$ 2,100)
JUL 2010	Exchange year tuition fee waiver, Imperial College London (~£11,200)
2007–08	Gold certificate, UK Senior Mathematical Challenge
2006–08	Science faculty, GlaxoSmithKline science, and mathematics prizes, Sevenoaks School
2006–07	Commendation in a science essay competition, Peterhouse, Cambridge

TEST SCORES

OCT 2022 Cattell Culture Fair III A Intelligence Test: 157 (percentile rank: 99)
OCT 2022 Cattell III B Intelligence Test: 154 (percentile rank: 98)
JAN 2019 Mensa Wonderlic: 32 (percentile rank: 95)
JAN 2019 RAIT Quantitative Intelligence Index: 148 (percentile rank: 99)
JAN 2019 RAIT Total Battery Intelligence Index: 472 (percentile rank: 98)

AFFILIATIONS

Member of Yoga Alliance Professionals since 2023.
